

```
import React from "react";
import Frame from 'react-frame-component';

const DemoFrame = ({height, className, children}) => {
  return (
    <Frame
      style={{height : `${height? height: '200px'}`}}
      head={<link type='text/css' rel='stylesheet' href='/css/light-theme.css'/>}
    >
      <div className={className}>
        {children}
      </div>
    </Frame>
  )
}

export default DemoFrame;
```
