

```
import React from "react";
import { Tabs } from "antd";

import BanKy from "./BanKy";
const SignReport = () => {
  const tabList = [
    {
      key: "1",
      label: "Bạn ký",
      children: <BanKy />,
    },
  ];
  return <Tabs items={tabList} />;
};

export default SignReport;
```
